

JATIN THAKUR

DevOps & Cloud Engineer

GitHub: github.com/jatinthakur011 | LinkedIn: linkedin.com/in/jatin--thakur | Email: jatuthakur170@gmail.com | Phone: +91 8091259662

PROFESSIONAL SUMMARY

Computer Science Engineering graduate with hands-on experience in AWS Cloud and DevOps engineering through a 4-month DevOps Fellowship with Apexon. Skilled in AWS, Terraform, CloudFormation, Jenkins, GitHub, Docker, Kubernetes (EKS), Linux, and CI/CD automation. Experienced in provisioning cloud infrastructure, containerizing applications, configuring networking and load balancing, and deploying production-style workloads on AWS. Strong foundation in Linux administration, networking, cloud infrastructure, and infrastructure automation.

TECHNICAL SKILLS

Cloud & AWS: AWS, EC2, VPC, IAM, S3, Application Load Balancer (ALB), Auto Scaling, CloudFormation, CloudWatch

DevOps & Infrastructure: Terraform, Ansible, Docker, Kubernetes, Amazon EKS, Jenkins, CI/CD, Git, GitHub

Systems & Networking: Linux, Nginx, Networking, Security Groups

EDUCATION

- **B.E. Computer Science Engineering** — Chitkara University, Baddi, Himachal Pradesh | 2022–2026 | CGPA: 8.25/10
- **Class XII, H.P. Board** — Radha Krishna Sr. Sec. School, Ghandalwin, Bilaspur | 2021–2022 | Percentage: 81%
- **Class X, H.P. Board** — Nav Chetna Public School, Leheri-Sarail, Bilaspur | 2019–2020 | Percentage: 86%

PROJECTS

AWS Three-Tier Chat Application Deployment | Cloud & DevOps

Feb 2026 – Jun 2026

- Designed and deployed a production-style three-tier chat application architecture on AWS using a custom VPC with public/private subnets, Internet Gateway, NAT Gateway, route tables, and security groups.
- Configured Nginx, Django, and MySQL on EC2 and integrated an Application Load Balancer for scalable and highly available application access.
- Automated AWS infrastructure provisioning using Terraform and CloudFormation, reducing manual infrastructure configuration.
- Implemented CI/CD workflows using Jenkins and GitHub for automated application delivery.
- Containerized application services using Docker and deployed workloads on Kubernetes (Amazon EKS).
- Configured IAM, Auto Scaling, and CloudWatch for access control, scalability, and monitoring.
- Performed Linux server administration and troubleshooting as part of application deployment and infrastructure management.

HealthHub — Healthcare Web Platform

Jul 2025 – Dec 2025

- Collaborated with a development team to build a full-stack healthcare platform connecting patients with doctors through a responsive, user-friendly interface.
- Developed frontend components using React.js, JavaScript, HTML, and CSS, and integrated backend APIs for appointment scheduling and profile management.
- Implemented doctor search, appointment booking, and emergency blood request/donation management features to improve patient accessibility.

TRAINING / FELLOWSHIP

DevOps Fellowship — Apexon

Feb 2026 – Jun 2026

In association with Chitkara University

- Completed a 4-month hands-on DevOps fellowship covering AWS Cloud, Linux, Networking, Terraform, Ansible, Jenkins, Docker, Kubernetes, CloudFormation, Monitoring, and Infrastructure Automation.
- Built and deployed production-style cloud infrastructure — provisioning resources with IaC, automating CI/CD pipelines, and configuring container orchestration on Kubernetes (EKS).
- Applied IAM, security groups, and Linux server administration in real-world DevOps workflows, gaining hands-on cloud networking and AWS monitoring experience.
